CONTENTS

Part 1. Introduction to time-frequency analysis	18
Part 2. An analysis of time-frequency representations	71
An analysis of some time-frequency and time-scale distributions, <i>LJ. Stanković</i>	72
An analysis of instantaneous frequency presentation using time-frequency distributions -Generalized Wigner distribution, <i>LJ. Stanković, S. Stanković</i>	89
Auto-term representation by the reduced interference distributions; The procedure for a kernel design, <i>LJ. Stanković</i>	95
Relationship between the Ambiguity function coordinate transformations and Fractional Fourier transform, <i>LJ. Stanković, I. Djurović</i>	106
On rotated time-frequency kernels, <i>T. Alieva, M. J. Bastiaans, LJ. Stanković</i>	110
Signal reconstruction from two close fractional Fourier power spectra, <i>T. Alieva, M. J. Bastiaans, LJ. Stanković</i>	117
A window width optimized S-transform, <i>E. Sejdić, I. Djurović, J. Jiang</i>	131
Frequency-based window width optimization for S-transform, <i>I. Djurović, E. Sejdić, J. Jiang</i>	147
Time-frequency feature representation using energy concentration: An overview of recent advances, <i>E. Sejdić, I. Djurović, J. Jiang</i>	154
Fractional Fourier transform as a signal processing tool: An overview of recent developments, <i>E. Sejdić, I. Djurović, LJ. Stanković</i>	189
Local polynomial Fourier transform: A review on recent developments and applications, <i>X. Li, G. Bi, S. Stanković, A. M. Zoubir</i>	216
Part 3. S-Method	250
A method for time-frequency signal analysis, <i>LJ. Stanković</i>	251
Signal dependent S-method, <i>LJ. Stanković</i>	258

Time-frequency representation based on the reassigned S-method,
I. Djurović, LJ. Stanković 264

Time-frequency analysis of multiple resonances in combustion engine
signals, *LJ. Stanković, J. F. Böhme* 269

A note on “An overview of aliasing errors in discrete time formulations of
time-frequency representations”, *LJ. Stanković, I. Djurović* 285

A measure of some time-frequency distributions concentration,
LJ. Stanković 289

Time-frequency signal analysis based on the windowed fractional
Fourier transform, *LJ. Stanković, T. Alieva, M. J. Bastiaans* 300

Estimation of multicomponent signals by using time-frequency
representations with application to knock signal analysis,
I. Djurović, M. Urlaub, J. F. Böhme, LJ. Stanković 311

Signal decomposition by using the S-method with application to the analysis
of HF radar signals in sea clutter,
LJ. Stanković, T. Thayaparan, M. Daković 318

Part 4. Noise influence on the time-frequency representations337

Wigner distribution of noisy signals,
LJ. Stanković, S. Stanković 338

On the Wigner distribution of the discrete-time noisy signals with
application to the study of quantization effects,
LJ. Stanković, S. Stanković 345

Unified approach to the noise analysis in the spectrogram and Wigner
distribution, *LJ. Stanković, V. Ivanović, Z. Petrović* 353

Further results on the minimum variance time-frequency distribution
kernels, *LJ. Stanković, V. Ivanović* 367

Do the reduced interference distributions reduce noise influence?
LJ. Stanković 378

An algorithm for the Wigner distribution of noisy signals realization,
LJ. Stanković 383

Finite word-length effects in implementation of distributions for time-frequency
analysis, *V. Ivanović, LJ. Stanković, D. Petranović* 387

The Wigner distribution of noisy signals with adaptive time-frequency
varying window, *LJ. Stanković, V. Katkovnik* 398

Estimates of the Wigner distribution in Gaussian noise environment, <i>I. Djurović, LJ. Stanković, J. F. Böhme</i>	412
Analysis of noise in time-frequency distributions, <i>LJ. Stanković</i>	417
Part 5. Higher order representations	424
An analysis of Wigner higher order spectra of multicomponent signals, <i>LJ. Stanković</i>	425
Multitime definition of the Wigner higher order distribution: L-Wigner distribution, <i>LJ. Stanković</i>	431
A method for improved distribution concentration in the time-frequency analysis of multicomponent signals using the L-Wigner distribution, <i>LJ. Stanković</i>	437
L-class of time-frequency distributions, <i>LJ. Stanković</i>	446
Modified Wigner bispectrum and its generalizations, <i>S. Stanković, LJ. Stanković, Z. Uskoković</i>	451
On the realization of the polynomial Wigner-Ville distribution for multicomponent signals, <i>LJ. Stanković</i>	461
Part 6. Highly concentrated energy distributions	466
A time-frequency distribution concentrated along the instantaneous frequency, <i>LJ. Stanković</i>	467
Highly concentrated time-frequency distributions: Pseudo quantum signal representation, <i>LJ. Stanković</i>	472
S class of time-frequency distributions, <i>LJ. Stanković</i>	484
Local polynomial Wigner distribution, <i>LJ. Stanković</i>	496
On the Capon's method application in time-frequency signal analysis, <i>LJ. Stanković, V. Popović, M. Daković</i>	500
Part 7. Instantaneous frequency estimation by using time-frequency representations	506
Instantaneous frequency estimation using the periodogram with time varying window length, <i>V. Katkovnik, LJ. Stanković</i>	507

Instantaneous frequency estimation using the Wigner distribution with varying and data driven window length, <i>V. Katkovnik, LJ. Stanković</i>	521
Algorithm for the instantaneous frequency estimation using time-frequency distributions with adaptive window width, <i>LJ. Stanković, V. Katkovnik</i>	535
Adaptive window in the polynomial Wigner-Ville distributions for the instantaneous frequency estimation of FM signal in additive Gaussian noise, <i>B. Barkat, B. Boashash, LJ. Stanković</i>	541
Instantaneous frequency estimation using robust spectrogram with varying window length, <i>V. Katkovnik, I. Djurović, LJ. Stanković</i>	547
Influence of high noise on the instantaneous frequency estimation using quadratic time-frequency distributions, <i>I. Djurović, LJ. Stanković</i>	560
Performance of spectrogram as IF estimator, <i>LJ. Stanković, M. Daković, V. Ivanović</i>	565
Parametric estimation of the FM signals using Wigner distribution-based maximum likelihood estimator, <i>I. Djurović, A. Ohsumi, H. Ijima</i>	569
Performance of quadratic time-frequency distributions as instantaneous frequency estimators, <i>V. Ivanović, M. Daković, LJ. Stanković</i>	576
Instantaneous frequency estimation by using the Wigner distribution and linear interpolation, <i>LJ. Stanković, I. Djurović, R. M. Laković</i>	593
An algorithm for the Wigner distribution based instantaneous frequency estimation in a high noise environment, <i>I. Djurović, LJ. Stanković</i>	602
Instantaneous frequency estimation using the S-transform, <i>E. Sejdić, LJ. Stanković, M. Daković, J. Jiang</i>	616
Quantitative performance analysis of scalogram as instantaneous frequency estimator, <i>E. Sejdić, I. Djurović, LJ. Stanković</i>	623
Part 8. Robust spectral and time-frequency analysis	636
Median filter based realizations of the robust time-frequency distributions, <i>I. Djurović, V. Katkovnik, LJ. Stanković</i>	637
Robust Wigner distribution with application to the instantaneous frequency estimation <i>I. Djurović, LJ. Stanković</i>	643
Robust two-dimensional DFT, <i>I. Djurović, LJ. Stanković, J. F. Böhme</i>	657

Realization of the robust filters in the frequency domain, <i>I. Djurović, LJ. Stanković</i>	663
Robust L-estimation based forms of signal transforms and time-frequency representations, <i>I. Djurović, LJ. Stanković, J. F. Böhme</i>	668
Analysis of polynomial FM signals corrupted by heavy-tailed noise, <i>B. Barkat, LJ. Stanković</i>	680
Robust adaptive local polynomial Fourier transform, <i>I. Djurović</i>	687
Estimation of FM signal parameters in impulse noise environment, <i>I. Djurović, LJ. Stanković, J.F. Boehme</i>	694
Robust time-frequency distributions based on the robust short time Fourier transform, <i>I. Djurović, LJ. Stanković, B. Barkat</i>	709
Robust DFT with high breakdown point for complex-valued impulse noise environment, <i>I. Djurović, V. L. Lukin</i>	722
A novel clipping technique for filtering FM signals embedded in intensive noise, <i>A. A. Roenko, V. V. Lukin, I. Djurović, X. Zhengguang</i>	728
Robust S-transform based on the L-DFT, <i>E. Sejdić, I. Djurović</i>	746
Part 9. Time-varying filtering	750
Time-varying filtering of speech signals using linear prediction, <i>S. Stanković, J. Tilp</i>	751
On the time-frequency analysis based filtering, <i>LJ. Stanković</i>	755
About time-variant filtering of speech signals with time-frequency distributions for hands-free telephone systems, <i>S. Stanković</i>	769
Order adaptive local polynomial FT based interference rejection in spread spectrum communication systems, <i>LJ. Stanković, S. Djukanović</i>	778
Local polynomial Fourier transform receiver for nonstationary interference excision in DSSS communications, <i>S. Djukanović, M. Daković, LJ. Stanković</i>	789
Bit error probability approximation for short-time Fourier transform based nonstationary interference excision in DS-SS systems, <i>S. Djukanović, M. Daković, LJ. Stanković</i>	801

A parametric method for non-stationary interference suppression in direct sequence spread-spectrum systems,
S. Djukanović, V. Popović, M. Daković, LJ. Stanković 811

Part 10. Multidimensional space-spatial frequency analysis821

On the local frequency, group shift and cross-terms in some multidimensional time-Frequency distributions; A method for multidimensional time-frequency analysis,
S. Stanković, LJ. Stanković, Z. Uskoković..... 822

Space/spatial-frequency analysis based filtering,
LJ. Stanković, S. Stanković, I. Djurović 832

Nonparametric algorithm for the local frequency estimation, of multidimensional signals, *I. Djurović, LJ. Stanković* 845

Moments of multidimensional polynomial FT,
I. Djurović, LJ. Stanković 855

Part 11. Adaptive algorithm for the bias to variance trade-off with applications860

Instantaneous frequency estimation using higher order L-Wigner distributions with data driven order and window length, *LJ. Stanković, V. Katkovnik* 861

Sensor array signal tracking using a data-driven window approach,
A. B. Gershman, LJ. Stanković, V. Katkovnik 876

An approach to variable step-size LMS algorithm,
B. Krstajić, LJ. Stanković, Z. Uskoković 885

Adaptive windowed Fourier transform,
I. Djurović, LJ. Stanković 888

Combined adaptive filter with LMS based algorithms,
B. Krstajić, LJ. Stanković, Z. Uskoković 898

Performance analysis of the adaptive algorithm for bias-to-variance trade-off,
LJ. Stanković 904

Modification of the ICI rule based IF estimator for high noise environments,
I. Djurović, LJ. Stanković 914

A window width optimized S-transform,
E. Sejdić, I. Djurović, J. Jiang 923

Frequency-based window width optimization for S-transform,
I. Djurović, E. Sejdić, J. Jiang 939

Part 12. Time-frequency distributions with complex-lag argument	946
Introducing time-frequency distribution with a "complex-time" argument, <i>S. Stanković, LJ. Stanković</i>	947
Time-frequency distributions with complex argument, <i>LJ. Stanković</i>	952
Generalized representation of phase derivatives for regular signals, <i>C. Cornu, S. Stanković, C. Ioana, A. Quinquis, LJ. Stanković</i>	968
General form of time-frequency distribution with complex-lag argument, <i>S. Stanković, N. Žarić, I. Orović, C. Ioana</i>	980
Effects of Cauchy integral formula discretization on the precision of IF estimation: unified approach to complex-lag distribution and its L-form, <i>S. Stanković, I. Orović, C. Ioana</i>	984
A class of highly concentrated time-frequency distributions based on the ambiguity domain representation and complex-lag moment, <i>I. Orović, S. Stanković</i>	991
Robust time-frequency distributions with complex-lag argument, <i>N. Žarić, I. Orović, S. Stanković</i>	1001
Time-frequency rate distributions with complex-lag argument, <i>S. Stanković, I. Orović</i>	1011
Part 13. Parameter estimation	1015
Robust DFT-based filtering of pulse-like FM signals corrupted by impulsive noise, <i>I. Djurović, V.V. Lukin</i>	1016
Estimation of the sinusoidal signal frequency based on the marginal median DFT, <i>I. Djurović</i>	1032
Estimation of single-tone signal parameters by using the L-DFT, <i>I. Djurović, V.V. Lukin</i>	1043
Modifications of the cubic phase function, <i>P Wang, I. Djurović, J. Yang</i>	1051
Generalized high-order phase function for parameter estimation of polynomial phase signal, <i>P Wang, I. Djurović, J. Yang</i>	1059
Instantaneous frequency rate estimation for high-order polynomial phase signals, <i>P Wang, H. Li, I. Djurović, B. Himed</i>	1069
Adaptive algorithm for chirp-rate estimation, <i>I. Djurović, C. Ioana, LJ. Stanković, P Wang</i>	1075

Integrated cubic phase function for linear FM signal analysis, <i>P Wang, H. Li, I. Djurović, B. Himed</i>	1085
Performance of instantaneous frequency rate estimation using high-order phase function, <i>P Wang, H. Li, I. Djurović, B. Himed</i>	1102
Viterbi algorithm for chirp-rate and instantaneous frequency estimation, <i>I. Djurović</i>	1114
An overview of the adaptive robust DFT, <i>A. Roenko, V. Lukin, I. Djurović</i>	1123
Modification of the robust chirp-rate estimator for impulse noise environments, <i>I. Djurović, P Wang, C. Ioana</i>	1140
Two approaches to adaptation of sample myriad to characteristics of SaS distribution data, <i>A. A. Roenko, V. V. Lukin, I. Djurović</i>	1148
Analysis of meridian estimator performance for non-Gaussian pdf data samples, <i>D. A. Kurkin, A. A. Roenko, V. V. Lukin, I. Djurović</i>	1162
Parameter estimation of 2-D polynomial cubic signals using cubic phase function with genetic algorithms, <i>I. Djurović, P. Wang, C. Ioana</i>	1170
CPF-HAF estimator of polynomial phase signals, <i>M. Simeunović, I. Djurović</i>	1184
Robust M-periodogram with dishotomous search, <i>S. Djukanović, I. Djurović</i>	1188
Aliasing detection and resolving in the estimation of polynomial-phase signal parameters, <i>S. Djukanović, I. Djurović</i>	1195
Part 14. Hardware and software solutions for time-frequency signal analysis	1201
A flexible system for time frequency analysis, <i>S. Stanković, D. Petranović, LJ. Stanković</i>	1202
An architecture for the realization of a system for time-frequency signal analysis, <i>S. Stanković, LJ. Stanković</i>	1211
System architecture for space-frequency image analysis, <i>S. Stanković, I. Djurović, V. Vuković</i>	1218
A virtual instrument for time-frequency analysis, <i>I. Djurović, LJ. Stanković</i>	1222
An architecture for the VLSI design of systems for time-frequency analysis and time-varying filtering, <i>S. Stanković, LJ. Stanković, V. Ivanović, R. Stojanović</i>	1233

Hardware realization of generalized time-frequency distribution with complex-lag argument, <i>N. Žarić, I. Orović, S. Stanković</i>	1251
A virtual instrument for time-frequency analysis of signals with highly non-stationary instantaneous frequency, <i>I. Orović, M. Orlandić, S. Stanković, Z. Uskoković</i>	1272
An implementation of the L-estimate distributions for analysis of signals in heavy-tailed noise, <i>N. Žarić, N. Lekić, S. Stanković</i>	1289
Part 15. Radar signal processing	1297
Adaptive local polynomial Fourier transform in ISAR, <i>I. Djurović, T. Thayaparan, LJ. Stanković</i>	1298
Time-frequency representation based approach for separation of target rigid body and micro-Doppler effects in ISAR imaging, <i>LJ. Stanković, T. Thayaparan, I. Djurović</i>	1314
Analysis of radar micro-Doppler signatures from experimental helicopter and human data, <i>T. Thayaparan, S. Abrol, E. Risebrough, LJ. Stanković, D. Lamothe, G. Duff</i>	1327
Adaptive S-Method for SAR/ISAR imaging, <i>LJ. Stanković, T. Thayaparan, V. Popović, I. Djurović, M. Daković</i>	1341
Real-time motion compensation, image formation and image enhancement of moving targets in ISAR and SAR using S-method based approach, <i>T. Thayaparan, LJ. Stanković, C. Wernik, M. Daković</i>	1353
Mutual interference and low probability of interception capabilities of noise radar, <i>T. Thayaparan, M. Daković, LJ. Stanković</i>	1376
Time-frequency-based non-stationary interference suppression for noise radar systems, <i>M. Daković, T. Thayaparan, S. Djukanović, LJ. Stanković</i>	1390
Motion compensation in ISAR imaging using the registration-restoration-fusion approach, <i>T. Thayaparan, G. Lampropoulos, LJ. Stanković</i>	1400
Micro-Doppler-based target detection and feature extraction in indoor and outdoor environments, <i>T. Thayaparan, LJ. Stanković, I. Djurović</i>	1417
SAR imaging of moving targets using polynomial Fourier transform, <i>I. Djurović, T. Thayaparan, LJ. Stanković</i>	1436
Time-frequency based detection of fast maneuvering targets, <i>M. Daković, T. Thayaparan, LJ. Stanković</i>	1448
Micro-Doppler parameter estimation from a fraction of the period, <i>T. Thayaparan, LJ. Stanković, M. Daković, V. Popović</i>	1462

Multiwindow S-method for instantaneous frequency estimation and its application in radar signal analysis, <i>I. Orović, S. Stanković, T. Thayaparan, LJ. Stanković</i>	1475
The two-dimensional Hermite S-method for high resolution inverse synthetic aperture radar imaging applications, <i>S. Stanković, I. Orović, A. Krylov</i>	1484
Autofocusing of SAR images based on parameters estimated from the PHAF, <i>V. Popović, I. Djurović, LJ. Stanković, T. Thayaparan, M. Daković</i>	1496
Method for nonstationary jammer suppression in noise radar systems, <i>S. Djukanović, M. Daković, T. Thayaparan, LJ. Stanković</i>	1510
Systemic approach explored in the context of passive target tracking, <i>F. Totir, C. Ioana, A. Serbanescu, J. Stopin, A. Lucian, S. Stanković</i>	1520
Cubic-phase function evaluation for multicomponent signals with application to SAR imaging, <i>I. Djurović, C. Ioana, T. Thayaparan, LJ. Stanković, P. Wang, V. Popović, M. Simeunović</i>	1532
A new approach for classification of human gait based on time-frequency feature representations, <i>I. Orović, S. Stanković, M. Amin</i>	1545
Influence of interference on range estimation in noise radar systems, <i>S. Djukanović</i>	1556
Part 16. Time-frequency analysis in digital watermarking and other multimedia applications	1562
Generalization of the Fourier domain watermarking to the space/spatial frequency domain, <i>I. Djurović, S. Stanković, I. Pitas, LJ. Stanković</i>	1563
Watermarking in the space/spatial-frequency domain using two-dimensional Radon Wigner distribution, <i>S. Stanković, I. Djurović, I. Pitas</i>	1568
Digital watermarking in the fractional Fourier transformation domain, <i>I. Djurović, S. Stanković, I. Pitas</i>	1583
Motion parameters estimation by using time-frequency representations, <i>S. Stanković, I. Djurović</i>	1587
Estimation of time-varying velocities of moving objects by time-frequency representations, <i>I. Djurović, S. Stanković</i>	1590
An approach to the optimal watermark detection, <i>S. Stanković, I. Djurović, R. Herpers, LJ. Stanković</i>	1609
Motion parameters estimation by new propagation approach and time-frequency representations, <i>I. Djurović, S. Stanković, A. Oshumi, H. Ijima</i>	1613

Robust speech watermarking procedure in the time-frequency domain <i>S. Stanković, I. Orović, N. Žarić</i>	1629
Speech signals protection via logo watermarking based on the time-frequency analysis, <i>I. Orović, P. Zogović, N. Žarić, S. Stanković</i>	1639
Robust watermarking procedure based on JPEG-DCT image compression <i>S. Stanković, I. Orović, N. Žarić</i>	1649
An application of multidimensional time-frequency analysis as a base for the unified watermarking approach, <i>S. Stanković, I. Orović, N. Žarić</i>	1661
Two dimensional time-frequency analysis based eigenvalue decomposition applied to image watermarking, <i>S. Stanković, I. Orović, N. Žarić, C. Ioana</i>	1674
Time-frequency based speech regions characterization and eigenvalue decomposition applied to speech watermarking, <i>S. Stanković, I. Orović</i>	1684
Time-frequency analysis and its application in digital watermarking <i>S. Stanković</i>	1697
Video frames reconstruction based on time-frequency analysis and Hermite projection method, <i>S. Stanković, I. Orović, A. Krylov</i>	1720
Part 17. Other applications	1733
Time-frequency representations based detector of chaos in oscillatory circuits, <i>V. Rubežić, I. Djurović, M. Daković</i>	1734
Multiwindow approach based on STFT for chaos detection in oscillatory circuits, <i>I. Djurović, V. Rubežić</i>	1751
Chaos detection in chaotic systems with large number of components in spectral domain, <i>I. Djurović, V. Rubežić</i>	1760
Interference analysis of multicarrier systems based on affine Fourier transform, <i>DJ. Stojanović, I. Djurović, B. R. Vojičić</i>	1766
Time-frequency analysis and Hermite projection method applied to swallowing accelerometry signals, <i>I. Orović, S. Stanković, T. Chau, C. M. Steele, E. Sejdić</i>	1772
A multicarrier communications based on the affine Fourier transform in doubly-dispersive channels, <i>DJ. Stojanović, I. Djurović, B. R. Vojičić</i>	1781
Part 18. Appendix	1795
Analysis of noise in time-frequency distributions, <i>LJ. Stanković</i>	1796

Adaptive instantaneous frequency estimation using TFDs,
LJ. Stanković 1803

Robust time-frequency distributions,
V. Katkovnik, I. Djurović, LJ. Stanković 1809

Time-frequency filtering of speech signals in hands-free telephone systems,
S. Stanković 1814

Measuring time-frequency distributions concentration,
LJ. Stanković 1820

Quadratic and higher order time-frequency analysis based on the STFT,
LJ. Stanković 1826

PREFACE

The aim of this research monograph is to present the results in time-frequency analysis achieved by the group within the Center for Signals, Systems, and Information Theory from the University of Montenegro, during the course of twenty years. It consists of the papers written and published in the leading international journals by the members of this group and their colleagues from other institutions all over the world.

The monograph is composed of selected papers grouped into eighteen parts, preceded by a short introduction to the respective area. Since the papers presented here are aimed for, and were published in the most renowned journals, it is sometimes assumed that the reader is already familiar with this area.

The work of this group has been supported, during these years, by several institutions. We want to thank to the Electrical Engineering Department of the University of Montenegro, Montenegrin Academy of Science and Art (CANU), Ministry of Science of Montenegro, the Alexander von Humboldt foundation, the Volkswagen foundation and the R&D Department of the Ministry of Defense of Canada.

Montenegro, November 2011.
